FIN3080
Investment Analysis and Portfolio Management
Stata Programming

Sun Yixin

Jan 17th , 2023

Self-introduction

- 23’ Financial Engineering - Quantitative Finance
- yixinsun@link.cuhk.edu.cn
- USTF of FIN2020 (T2 2021-22) and FIN4120 (T1 2022-23)
- Applying for Master’s of Business Analytics, Operation Research, and Fintech
- Feel free to contact me!

Learning experience

- Lectures: Insights of the financial industry
- Final exam: Pay attention to lectures and qualitative materials
- Homework (Project)
  - Think about the questions, pls do not rush to deal with the data
  - Programming is very important!
  - Write a document (mind map) about the working processes
    - Data sourcing → Data processing and transformation → Visualization → Statistical Analysis
    - Write do files for Stata
    - Keep the coding concise and informative

Data sourcing

- CSMAR might be the most efficient way
- You can access it on school web or by connecting to the school VPN
- Pay attention to
  - Data frequency, type, date, ticker required by the projects
  - Check the data documents for calculation details
  - Explain for the choosing of variables

Data processing and transformation

- Set Up
- Import Data
- Explore Data
- Set as Panel Data
- Create New Variables
- Data Transformation
- Save .dta file
- Combine Two Data Set

Visualization

- Time series plot

Statistical Analysis

- Regression
- Output as excel

Thank you for attending

- Practice more
- Good luck
