Please create a mind map based on Part I of our course

- **Identify a central theme that differs from the established one.**
  - The scope of human exploration of the physical universe is vast; consider narrowing down to a more specific central theme.
  - The main topic or theme should be clearly labeled and serve as the starting point for all branches.
- **Attempt to identify the relationship of the texts with the central theme, and explore the connections between the texts to demonstrate how they collectively illuminate the central theme.**
  - Use arrows or lines to show these relationships, and provide brief annotations where necessary to explain the linkage.
  - Branches or sub-branches should offer supporting information, including specific details, examples, or related concepts, to enhance overall understanding.

Language:

- English (clarity and brevity are highly prized)

Readability and Clarity:

- Ensure that text is legible, with consistent and clear handwriting or font if digital tools are used.
- Organize the layout to avoid overcrowding, ensuring that the mind map is easy to follow and understand.

Originality:

- Encourage original representations of ideas and unique layout.

Format and Submission:

- The mind map could be hand-drawn or digital.
- The filename should be in this format: YourName.PDF (e.g., ChanTaiMan.PDF).
- Please submit your file on Blackboard using the "Mind Map I" link.
- Mind map I deadline: 23:55, March 1st, 2025. Late submission is not allowed.
