Prohibition of Use of AI, including Generative AI tools, in completing assignments for GE Foundation courses
禁止在撰寫通識教育基礎課程作業中使用人工智能，包括生成式人工智能工具。

AI, and Generative AI (GAI) in particular, has been intensively discussed because it is generally believed in the educational sector that the use of AI will revolutionize teaching and learning. The University has issued clear guidelines for the use of AI to students.[1] The document makes clear that "as a general principle, students are prohibited from using any AI tools to complete their assignments, assessments and any other works that count toward their final grade of the course of attainment of the desired learning outcomes, unless explicitly permitted." The GE foundation courses "In Dialogue with Humanity" and "In Dialogue with Nature" aim at cultivating students' abilities to read, to think, and to write. In reading, students should engage in a dialogue with the classics to form their own views on perennial issues regarding nature, technology, life, and society; and writing is a form of articulation of their understanding and reflection. For these purposes, the role of AI, and GAI in particular, is very limited. Hence, the two foundation courses have adopted the default approach to the use of AI as stipulated in the university guidelines: Students of the foundation courses are expected to draft their reflective essays and term papers independently without the use of AI tools. This means students are prohibited from using any AI tools in completing the above-mentioned written assignments and assessments that count towards students' final grade of the courses.

近年，針對生成式人工智能的討論相當熾烈，因爲學界普遍預期它對教與學會帶來徹底的改變。大學發佈了同學在學習中使用人工智能的指引。文件明確指出：「除非有明確允許，原則上學生不得使用任何人工智能工具來完成作業、評估和任何其他與課程最終成績或預期學習成果相關的工作。」大學通識基礎課程「與人文對話」和「與自然對話」的目標是培養學生的閱讀、思考和寫作能力。在閱讀時，同學應與經典開展「對話」，對自然、科技、人生和社會等有關的恆久課題有自己的看法；寫作則是他們理解和反思的表達方式。人工智能，尤其生成式人工智能對達成上述課程目標的作用極爲有限。因此，兩門基礎課程採用了大學指引中的第一種方式，也就是一般預設的方針：學生應獨立完成自己的思辨短寫和期末論文，不得使用任何人工智能工具。換句話說，學生在完成上述與期末成績有關的功課或任何評估作業時，不得使用任何人工智能工具。

使用 VeriGuide AWD 檢查寫作作業/ Checking written assignments with the VeriGuide AWD

- 同學在撰寫寫作作業時不得使用任何人工智能工具。在提交作業之前，應使用 VeriGuide AWD 檢查作業的 AI 指數 (AI Index)。一般來說，AI 指數愈高，學生花的工夫愈少，作業質量也愈差。

  Students are prohibited from using any AI tools in completing written assignments. Students should use the VeriGuide AWD to check the AI index of their assignments before submission. As a rule of thumb, the higher the AI index, the less the effort the student has taken, and the poorer the quality of the assignment.

- VeriGuide AWD 位於 http://www.cuhk.edu.hk/veriguide/ 第三項。
  VeriGuide AWD can be found at the third item of the webpage: http://www.cuhk.edu.hk/veriguide/

- 若指數高於 25%，作業有機會被評為不及格，同學亦要承擔被視為以人工智能代筆的風險，老師也保留把該作業上報通識教育部紀律委員會的權利。應注意，以人工智能代筆與抄襲作業罰則相若。

  If the AI index of an assignment exceeds 25%, this assignment may get an F grade. Students may bear the risk of being suspected of using AI to complete the assignment, and teachers retain the right to report the case to the Disciplinary Committee of the Office of University General Education. One should note that the penalty for using AI in an assignment is about the same as that for plagiarism.

- AWD 判定有三個範疇: 個人創作、人工智能、不確定。測試發現，原來判定為「不確定」的段落在第二次測試時有機會變爲「人工智能」，AI 指數也相應提高，所以不單避免文章段落被評爲「人工智能」，也要避免出現「不確定」的段落。
  AWD lists results in three categories: Human, AI, uncertain. Test runs of the Detector show that the same paragraph (text chunk) which was classified as “uncertain” in a previous AWD checking, can be classified as “AI” in a second one. The AI index of the assignment rises accordingly. Hence avoid submitting not only paragraphs classified as “AI”, but also those classified as “uncertain” to VeriGuide.

- 簡單忠告：不要使用人工智能工具協助書寫作業。
  Advice: DO NOT use GAI to help write papers.
